# *About Us*

As SMART PRISON, we produce with low and applicable energy sources, without using any chemicals that harm all living things, and using the highest level of technology to combat virus and bacteria carriers, especially mosquitoes, which are harmful in nature. In addition, we have come a long way towards becoming a strong brand by continuing our development with an innovative and original design approach that attaches importance to quality. We have always prioritized development and innovation in the design, engineering and product management stages of our products in our production area. We have paid attention to the fact that the materials we use in all our products are world-class and approved in quality.

Our company started production after 4 years of serious R&D work.

Our company vision is to meet the needs of our customers in the best way and to provide 100% satisfaction by producing innovative and distinctive products in the world, especially in human health and in the required markets.

## **Our Mission**

To grow our market by keeping the technological infrastructure strong in our sector, without harming the living population in nature and prioritizing human health.

## **Our Vision**

is to become a strong brand by providing development through staff training, continuous improvement and efficiency, and opening up to domestic and international markets.

## WHY SMART PRISON?

While attracting flies, it traps the flies without using any chemical substances and without poisoning nature and the habitats of all living things.

It is an exterior product with a very large area of effect. It cleans the designated living areas from flies, not the inside of a building.

Resistant to all weather conditions. (rain, sun, snow etc.)

Maintaining ecological balance is our first priority. You can't keep creatures like bees and butterflies it doesn't attract.

Reduces the fly population in regularly used living spaces and makes it a fly-free living space.

UNCONSCIOUS SPRAYING DISRUPTS THE ECOLOGICAL  
BALANCE AND KILLS BENEFICIAL INSECTS!

## ***GENERALLY***

*The device we produce is designed for suiting city aesthetics and to be used outdoors. With its zero chemical, zero waste and 100% organic content, it attracts mosquitoes and traps them in its own chamber. By imitating moonlight and human scent, and with its automatic vacuum system, it creates a vacuum for male and female flies to approach the room and trap them in the net. Thanks to this device, the harm caused by the chemicals used in pesticide application to other animals, plants and humans has been reduced to zero. Destroying the germs and viruses carried by flies before they spread around, isolating and destroying the poisoned animal before it carries the virus. With the fly catching pole, pesticide costs, staff costs and vehicle costs are eliminated. As long as the scent cartridge and lamp maintenance is done regularly, the device will fight against flies 24/7. It is mounted on lighting poles in parks and gardens as a scone and the application is made using the electricity in the existing poles. And there is no need for any substructure.*

*It is also a useful urban furniture thanks to its aesthetic appearance and dim lighting at night.*
